

Why digital?

**Digital Skills and the
Future of Labour
Market**

Digital Technology has changed the way we go about our lives

- Shopping

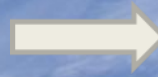

- Finance

- Play

- Socialize

facebook

**90% of jobs today in 2015
require some form of
digital skills.**

**According to the EU
Digital Agenda for Europe,
we might be short of
825.000 ICT professionals
in 2020**

So, what digital skills do young people need for the next future?

The UK Government agency digitalskills.com suggests to divide them into five categories:

**Managing
information**

Communicating

Creating

Transacting

**Problem
Solving**

Managing information

- **Finding**
- **Managing**
- **Storing**

Communicating

- **Communicating**
- **Interacting**
- **Collaborating**
- **Sharing**
- **Connecting**

Transacting

- **Purchasing and selling goods and services**
- **Organizing our own finances**
- **Registering for and using governmental and European digital services**

Problem Solving

- **Solving problems using digital tools to increase our independence and confidence**
- **Using digital tools to find solutions**

Creating

Merely using the contents we find in the web does not make people digitally competent.

Young people need to create content on the web in order to be competitive on the labour market. It requires advanced digital skills.

They need to acquire them, right now, at school.
